Find mistakes (89-95). There is one mistake in every line. Write the correct variant instead of the one given.

(89) So, if Hollywood hasn't gotten it right, what exactly is forensic psychology?
On the surface,

(90) this seems like relatively simple question to answer, and it is undoubtedly an important

(91) question to ask. When being introduced to a new field of psychology, like you are now, one

(92) of first questions you probably ask yourself is “What am I going to be studying?”

(93) Although providing a clear and comprehensively definition of the discipline is obviously a

(94) logical way to begin a textbook on foreign psychology, this task is far more difficult than it

(95) seems because there are no generally accepted definition of the field.

Make up definitions and write out the code (e.g. EC, BD, etc).

(96) phobic disorder	A. are mental disorders that involve experiencing a disconnection and lack of continuity between thoughts, memories, surroundings, actions and identity.	A. They seem though to have no identifiable physical cause.
